WORK EXPERIENCE

Associate Front End UI Developer

Broadway Bank - September 2016 – Present

- Responsible for designing page layout using HTML5, CSS3 along with jQuery and adding dynamic functionality to each module.
- Working on all the latest technologies like HTML5, CSS3, etc. Tackling various issues related to browser compatibility to accommodate these advanced and fast technologies.
- Developed Javascript based components using ExtJs framework like a grid, tree panel with client reports customized according to user requirements.
- Designing frontend within object-oriented Javascript frameworks like Angular.Js and Ext.Js.
- Developing user interface framework like an inversion of the control module of spring framework and deployed an application on tomcat.
- Implementing user interface for the google analytics data visualization. Used ExtJS graphed in an Ajax-driven user interface.
- Designed and developed prototype module using Angular.Js and Node.Js, implemented pagination, and datagrid added additional functionality for datagrid.

Front End Developer

ABC Corp - 2015 – 2016

- Built web pages that are more user-interactive using ES6, Typescript, and Angular2.
- Used Angular2 for building rich internet applications and to improve the speed.
- Attended the everyday enterprise workflow stand-up meeting to provide current status, thus implementing agile (scrum) methodology.
- Developed the administrative UI using backbone.Js.
- Developed Javascript functions to fetch the data from the google analytics API.
- Used Javascript for writing various timer controlled scripts for the website, including from page validations, dynamic content and roll over and working in an object-oriented approach.
- Created Ajax requests to rest service with the only use of getting method for retrieval.
