## CAREER OBJECTIVES

Software Engineer with 2.11+ years of experience building and maintaining responsive websites in the technology and service industry. Highly skilled in HTML, CSS, JavaScript, and jQuery alongside modern frameworks and libraries. Interested in transitioning to the finance domain, particularly in the Invoice to Cash process, to leverage my technical skills and contribute to enhancing operational efficiency and customer satisfaction. Committed to maintaining high standards of accuracy and efficiency in financial operations.

## Work Experience and Projects

**2021-2022    AWS Mavericks, Fintech, Gaming Convention, Smart Manufacturing (Rock well)**

*Lead developer*

Summary    All the above are Microsite Designed and developed for Network18 group. The main theme of this microsite was to allow the register and provide axis to live events respectively.

Technicality    The entire site is developed in PHP with UTM source tracking. For frontend validations JavaScript and Ajax call for data transfer.

**2021-2022    Exide Batteries**

*Developer, Support*

Summary    Solar System Sizing Calculator is associated with Exide batteries. It gathers home appliance's data as input, and suggests the required battery, ups inverter load and estimated cost

Technicality    It is a PWA Website developed using JavaScript, HTML, CSS and Ajax call for data transfer.

**2021-2022    Daimler and Jio (Money control, Network 18)**

*Development, support and Sanity*

Summary    For Daimler created a CMS for dealer and clint management. Money Control and Network18 are designed for Jio apps. Money control is based on stock market and Network18 is news app.

Technicality    It is developed using React.js, Bootstrap3, CSS and jQuery.

**2021-2022    BMW and SMOSS**

*Development, BMW one app and SMOSS operation support.*

Summary    BMW manages its customers through OneApp – for android users and SMOSS manages all Website related markets.

Technicality    OneApp is developed in React Native and SMOSS operations are managed by using various Tools like Grafana, Kubectl. The data base is managed by PGAdmin. To manage various Campines, sales and finance CMS is used for both platforms.
